Sweatshop on P-Chess: the UI redo's game screens

Home, name dialog and searching (UI-022), game screen board and side panel (UI-023) and game-over card (UI-024); GPT-6.1 Terra lineup, lane `ui-game`

Foreman, session `sweatshop/ui-game/2026-10-31-1734`

31 October 2026

Summary

First run of the `ui-game` lane, in its clone at `.artifacts-build/lanes/ui-game`, side by side with the `ui-review` and `ui-screens` lanes. UI-021 (the shared theme) was already on `main`. Launch at 17:34, last merge at 19:19, session PR #36.

- **Produced:** the three lane tickets merged on the session with `Verdict: Approve`: UI-022, UI-023 (`Review: human`, still waiting for Bruno) and UI-024. Gate 416 executed, 0 failed, 7 skipped (6 need Lc0, 1 needs a display); 413 passed before the run.
- **Cost: $9.03** at API list price over 12 stages, all priced: `gpt-6.1-terra xhigh` implementing $4.54 (6), `gpt-6.1-sol xhigh` reviewing $4.49 (6). Codex quota: 8 points of the weekly window (Terra xhigh 4, Sol xhigh 4; ±1 per stage, the total is exact), no reset; 2 Codex rollouts outside the stages, 0 points. Two sibling lanes ran on the same account at the same time.
- **What went wrong:** every ticket was reopened once, all for real defects, and two of the four findings were the same one: a long player name cut off at 800×600 (UI-022, then UI-024, whose implementer had noted the risk in its own handoff and left it). UI-022's review also showed that UI-021's font weights never render; the fix is CLEAN-012, filed outside this lane, and it holds PR #36 off `main`.
- **Provisional verdict:** Terra xhigh again reached review on every first attempt (3 of 3, 11–27 min), no early stop. Its fixes took 5–6 min. Its pair with Sol xhigh is now 35% reopened over 17 reviews.

What was done

UI-022: Home, the first-launch name dialog and the searching screen now follow the v0.1.0 design: the board on the left, the title, the Maia level selector, a 2×2 grid of quick-play buttons with icons, and History, Profile, Settings and Quit with icons below; the searching card has a spinner, "Starting your game", the live status and chips for time control and level. Main files `ui/home.tscn`, `ui/name_dialog.tscn`, `ui/searching.tscn`. Reopened once: a long player name ran past the searching card and the window at 800×600; the player label in `ui/searching.gd`/`ui/searching.tscn` had no width bound. It now ends in an ellipsis and the full name stays saved.

UI-023: the game screen: Lichess brown board with the design's last-move colours, coordinates inside the squares and the resize grip's icon; a side panel card with both players' rows (score box, avatar, name, clock; the running clock is the light one), the move list as a numbered table, Offer draw and Resign with icons, a red "Click again to resign" with a draining bar, and the "Maia declined"/"Draw agreed" notice. The in-game Settings button, the material counters and the side Review button are gone, as Bruno decided, with `tests/test_material.gd`; `docs/spec.md` §8.4, §8.7, §9.2 and §9.3 say so. Main files `ui/main.tscn`, `ui/main.gd`, `ui/move_list.gd`, `ui/board_view.gd`. Reopened once for two regressions of its own change: each new move threw the move list back to the end even when you had scrolled up to read (`ui/move_list.gd` rebuilt the table), and after a rematch in F11 focus mode the previous game's draw notice came back and stayed (`ui/main.gd` did not clear the saved notice).

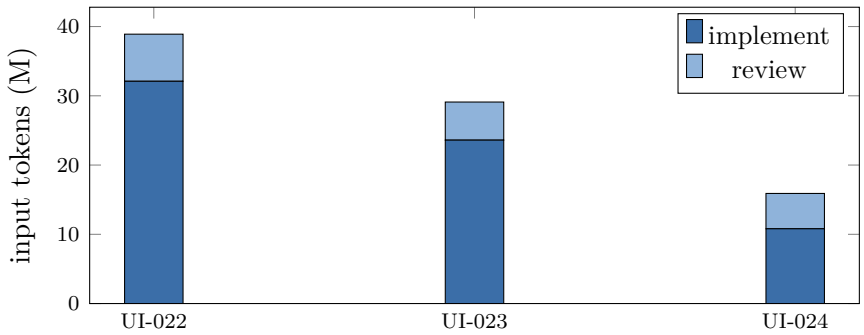

extbfUI-024: the game-over card: a head tinted by the result with a trophy, flag or one-half icon, both players with avatars and the winner ringed in gold, the match score, a green “Review” button with “New game” and “Rematch” below, Copy PGN at the top left (the review's action) and a close button. Main files `ui/game_over.tscn`, `ui/game_over.gd`. Reopened once: long player names were cut at both ends with no ellipsis (`clip_text` in `ui/game_over.tscn`).

Timeline

17:25	Lane clone made, assets imported, baseline gate 413 passed.
17:34	Launch, default lineup (Terra), pid 29104; proxy pinged, Codex sessions reach it directly.
18:01–18:08	UI-022 to review (27 min), reopened (long name on Searching); CLEAN-012 filed.
18:13–18:19	UI-022 fixed in 5 min, merged (proxy: merge into the session, CLEAN-012 holds `main`).
18:19–18:25	UI-023 stage 2 asks the proxy twice (scope of `ui/game_over.gd` and `scripts/screens.gd`).
18:40–18:45	UI-023 to review (21 min), reopened (move-list scroll, stale notice).
18:51–18:54	UI-023 fixed in 6 min, merged.
19:05–19:12	UI-024 to review (11 min), reopened (long names on the card).
19:16–19:19	UI-024 fixed in 5 min, merged. Nothing left; PR #36 (3 tickets).

Per stage

When	Ticket	Stage	Model	Min	In	Cache	Out	Cost	Outcome
18:01	UI-022	impl	terra xhigh	27	28.4M	99%	50k	1.81	to-review
18:08	UI-022	review	sol xhigh	6	4.7M	95%	23k	1.10	reopened
18:13	UI-022	impl	terra xhigh	5	3.7M	98%	7k	0.30	to-review
18:19	UI-022	review	sol xhigh	5	2.1M	94%	14k	0.58	merged
18:40	UI-023	impl	terra xhigh	21	19.2M	99%	43k	1.30	to-review
18:45	UI-023	review	sol xhigh	5	4.0M	95%	20k	0.98	reopened
18:51	UI-023	impl	terra xhigh	6	4.4M	98%	9k	0.33	to-review
18:54	UI-023	review	sol xhigh	3	1.5M	93%	10k	0.46	merged
19:05	UI-024	impl	terra xhigh	11	8.5M	99%	24k	0.62	to-review
19:12	UI-024	review	sol xhigh	6	3.3M	95%	20k	0.84	reopened
19:16	UI-024	impl	terra xhigh	5	2.3M	98%	5k	0.19	to-review
19:19	UI-024	review	sol xhigh	3	1.8M	93%	12k	0.54	merged
				103	83.9M		237k	9.03	

Wasted: no failed or asked stage. The three reopens cost a fix and a second review each ($0.82 + $0.79 + $0.73 = $2.34, 26% of the run); UI-024's could have been avoided, since its implementer named the defect and handed it on. Input is 79% implementation, mostly cached.

Comparison with previous runs

From `run-log.md`. The `v010` lane's run 3 (9 tickets) cost $2.30 per merged ticket; this run $3.01, with every ticket reopened (6 of 9 there). Terra xhigh's first stage 2 took 27, 21 and 11 min here against

11–12 min there; these screens touch more scenes and capture screenshots at two sizes. Fixes after a reopen took 5–6 min, as before (4–9). Reviews cost $0.46–1.10 ($0.46–1.05 there). The `ui-base` lane's UI-021 cost $2.48 in two stages.

Observations per model

- **gpt-6.1-terra xhigh, stage 2** (6 stages, 3 tickets): every stage reached review, every fix test-first with the red run recorded. Two of its four findings were regressions next to its own change (UI-023), two were the same 800×600 long-name check, which it did not run on UI-024 although it wrote "Long player names can be clipped" in that handoff and UI-022 had just been reopened for it. It asked the proxy twice on UI-023 for files outside the Primary list, both needed.
- **gpt-6.1-sol xhigh, review** (6 stages, 3–6 min): every reopen was reproduced with a probe and numbers (label rects, scroll offsets, notice state). It found and proved the UI-021 font-weight miss (TextServer reports no applied axis) and filed CLEAN-012 instead of fixing outside the ticket. It reused gate receipts and did not rerun the display-only pixel test; the foreman ran it (Acceptance).

Driver and runtime issues

1. None in the driver: no crash, no timeout, no API error, no parked handoff. Shutdown 1.0–1.8 s per stage.
2. The new clone needed `godot --headless --import` and `*.uid`/`*.import` in `.git/info/exclude` before its tree was clean; the import rewrote `fonts/NotoSans-Variable.ttf.import` with LF endings (restored by checkout).
3. Lc0 is not in the clone: the six engine tests skip and no stage played a real game.
4. Every screenshot was written to `%TEMP%`. The foreman copied the before, after and reference PNGs to `.artifacts-build/ui-game-screens/` (ignored) so they outlive a temp cleanup.

Recommendations

1. Run CLEAN-012 (shared font weights, `ui/theme/p_chess.tres`) before PR #36 merges: every ticket here records it as an integration condition. It sits in `.scratch/ui-base/issues/` with prefix `74`, the same as UI-022's file; renumber it when it runs.
2. Add "a long player name at 800×600" to the shared acceptance in `.scratch/ui-redo/spec.md`: it reopened two of three tickets here, and History, Review and Profile also show the name.
3. Ticket the display-only failure of `test_editor_right_click_refreshes_tree_and_board` in `test_repertoire.gd`: with a real display it fails on `main` too (2 assertions), so it is not this lane's, but the headless gate never sees it.
4. Keep screenshot evidence in an ignored folder of the repo instead of `%TEMP%` (`scripts/screens.gd` usage in `docs/design/v0.1.0/README.md`).

Human debt and proxy decisions

No `Débito humano:` lines in this run's tickets. Three proxy decisions, all by `opus-5.5 xhigh`, asked by the stages themselves (Codex reached the proxy directly):

- UI-022: `Proxy decided (opus-5.5 xhigh)`: "Approve UI-022 and close it the normal way: merge into the session branch, add the ledger line, set `Stage: done`, and keep the CLEAN-012 disclosure at `pending | integration` — integration means the session PR landing on `main`, and merging into the session branch is not that."
- UI-023: `Proxy decided (opus-5.5 xhigh)`: "Yes. Add `ui/game_over.gd` and `scripts/screens.gd` to Primary files, scoped to removing the side Review button and updating the one call site. No restyling. Criterion 4 can't pass without them."

- UI-023: `Proxy decided (opus-5.5 xhigh)`: "Yes, widen the `scripts/screens.gd` scope for the four UI-023 boards — the fixture should show the game screen the way `_start` leaves it, or shared acceptance 1 and 4 compare against a state the app never shows."

Acceptance

Probes on the session head `be29801`: the headless gate (416 executed, 0 failed, 7 skipped); the full suite with a display, where `test_last_move_uses_the_two_design_colours` passes (#cdd26a light, #aaa23a dark) and the one failure is the pre-existing repertoire test above (it fails on `main acb4662` too). Reviews checked 1280×800 and 800×600 captures against the reference PNGs for all ten boards, with differences listed in each ticket. Not examined: real play with Lc0, physical input, audio, and Bruno's visual comparison; final visual acceptance waits on CLEAN-012.

Reopen attribution

Labelled by the foreman (opus-5.5); the reviewer was `gpt-6.1-sol xhigh`, so no self-judging. Rows appended to `.scratch/reopen-attribution.md`.

Ticket (round)	Finding	Label	Why
UI-022 (1)	Long name overflows the Searching card at 800×600	S2-explícito/ código ?	criterion 4 carries "nothing clipped at 800×600"; borderline, long names not named
UI-023 (1)	New move throws the move list back to the end	S2-implícito	regression of its own table rewrite
UI-023 (1)	Old draw notice returns after a rematch in focus mode	S2-implícito	cleanup path of state it kept for focus mode
UI-024 (1)	Long names clipped on the card, no ellipsis	S2-explícito/ código	criterion 5; disclosed by stage 2 and left

Totals, reopens: S2-explícito/código 2 (one borderline), S2-implícito 2, S1 0, S3-ruído 0; fixed in review: none. No review-induced churn, no drip-feed. One post-approval finding, recorded as `session-review`, `unclassified`, review miss `yes`: UI-021's font weights (criterion 2) never applied; its approval checked the resource, not the rendered axes. Found by UI-022's review after PR #33 merged; follow-up CLEAN-012.

Scoreboard

`scoreboard.ps1` over the ClassyCall, EasyMath, PhysiSyst, SIGAA-ME and SynchroNice main checkouts plus this lane's clone in place of P-Chess's main checkout (same merged run log; it holds this run's attribution rows before they reach `main`). Moved since the `v010` run 3 report: implementer `gpt-6.1-terra xhigh` 11 → 18 stage runs, 0 failed, 1 asked (earlier); pair `gpt-6.1-terra xhigh` → `gpt-6.1-sol xhigh` 10 → 17 reviews, 30% → 35% (S2 rate 35%, fixed in review 2, UI-021's included); the same reviewer over `gpt-6.1-terra high` stays at 30% (20 reviews) and over `gpt-6.1-sol high` at 23% (22). Both Terra pairs now sit 7–12 points above Sol high under the same reviewer, each over 17 or more reviews. Interventions: automatic-recovery 101 → 110, proxy-decision (opus-5.5 xhigh) 6 → 11 (other lanes included).

Implementer	Stage runs	To review	Failed	Asked	Median min to review	Cost

Pending for the human

1. Do not merge PR #36 before CLEAN-012 (shared font weights) is implemented, reviewed and on `main`; then sync this session and merge.
2. UI-023 is `Review: human`: read its diff and compare `.artifacts-build/ui-game-screens/UI-023/` with the references.
3. Play with Lc0 installed: first launch (name dialog), quick play through Searching, a game with drag/premove, draw offer, resign confirm, F11 focus and rematch, the grip, Ctrl+,; win, loss and draw cards, Copy PGN and close.
